ONJECTIVE

Passionate B.Voc Software Development graduate with expertise in ReactJS, JavaScript, HTML, and CSS, seeking a Frontend Developer role to build dynamic, responsive, and user-centric web applications using modern frontend technologies.

WORK EXPERIENCE

React Developer Intern

Sonnen Technologies, Indore, M.P

- Gained hands-on experience developing React applications and frontend solutions.

Web Developer

Capex Global Solution, Indore, M.P

- Developed and maintained live websites using ReactJS, ensuring responsive design and seamless user experience.
- Collaborated with UI/UX designers to implement modern, interactive features across web platforms.
- Participated in performance optimization and code reviews, improving page load speed and code quality.
- Utilized tools like Git, Figma, and REST APIs to manage development workflow and frontend integration.

Python Developer Intern

Universal Informatics, Indore, M.P

- Completed a Python internship focusing on practical applications and development.

Software Developer

CL Coding, Pune, India

- Developed backend systems and applications using Python, focusing on clean, maintainable, and scalable code.
- Automated tasks and built internal tools for data processing, reporting, and performance monitoring.
- Collaborated with frontend developers to connect Python backends with React-based interfaces.
- Used version control systems (Git) and followed Agile methodologies to deliver clientready solutions.

PROJECT WORK EXPERIENCE

Portfolio Website

- Personal portfolio showcasing technical and creative skills, fully responsive and optimized for performance.

Nomadic Tribe Website

- Cultural showcase website promoting tribal heritage, built using responsive frontend technologies.

Skyfunded Web Portal

- A modern business website with responsive design, built for Skyfunded to promote services and handle client inquiries.

Event Management Web App

- A dynamic event planning platform for organizing, promoting, and tracking events with real-time updates and RSVP management.

Face Attendance System using Python
- A computer vision-based project using OpenCV and face_recognition to automate student attendance securely and efficiently.
